

# A PROVEN SOLUTION For Repetitive Strain Injuries

Remedy Interactive's RSIGuard is an award-winning desktop ergonomic software solution that reduces the impact of repetitive strain injuries (RSI) for office workers. Around the globe, health and safety managers, workers' compensation managers, physical therapists, medical practitioners, ergonomists and individual computer users rely on RSIGuard's comprehensive set of tools to:

Proactively identify risks of repetitive strain injuries early  
Reduce the risk of injuries  
Increase injury prevention program efficiency

- Proactively identify risks of repetitive strain injuries early
- Reduce the risk of injuries
- Increase injury prevention program efficiency

## Do You Know Who Your Highest Risk Employees Are?

Workers' compensation managers and health and safety managers are concerned with maintaining efficient work environments and high productivity while keeping the rise of injuries low. In the office, RSIGuard facilitates your injury prevention programs by automating the collection of employee work practice data, generating insight from that information, and applying personalized solutions for your employees with the highest risk of injury. The result is an increase in employee productivity and a reduction in risk.

## Do You Know Your Patients' Biggest Workplace Risk Factors?

As a medical practitioner, physical therapist or ergonomist, you need to evaluate a variety of work environments and make injury prevention recommendations to individuals and organizations. RSIGuard provides rich analytical feedback on human-to-computer interaction and potential workplace risks so you better understand those risks and can make more informed recommendations for your clients.

## How Well Do You Know Your Own Work Style?

If you frequently work on a computer, RSIGuard offers powerful personalized software tools to:

- Provide insight into your own repetitive stress risk factors
- Identify opportunities for injury prevention
- Help you work more comfortably at your computer for longer periods of time
