Remedy Interactive Announces Windows 7 Support for RSIGuard Ergonomic Software

SAUSALITO, CA – May 11, 2009 – [Remedy Interactive](#) Inc. today announced support for Microsoft® Windows® 7 Release Candidate by releasing a compatible version of its [RSIGuard](#)™ software. An award-winning desktop [injury prevention software](#), RSIGuard reduces the impact of [repetitive strain injuries](#) (RSI) for office workers. RSIGuard is the first and only injury prevention software provider to support Windows 7.

“By supporting Windows 7, Remedy Interactive extends its leadership in the desktop injury prevention software market,” said Kim Weiss Lopez, CEO of Remedy Interactive. “As the first and only company in our category to support Windows 7, 32 and 64 bit Windows Vista, and Apple Macintosh OS 10.3+, customers can feel confident in our product roadmap, our software reliability and performance, and our commitment to innovation.”

Availability

RSIGuard customers with customized installation packages that are under a current maintenance agreement may request an RSIGuard update for use in testing Windows 7. Any organization that is interested in testing RSIGuard Version 4 Stretch or Call Center Editions with Windows 7 should download the latest version of RSIGuard from www.rsiguard.com/download.

Remedy Interactive also announced plans to discontinue sales of RSIGuard Version 3 Standard Edition on October 31, 2009. Support for RSIGuard Version 3 Standard Edition will end on October 31, 2010. Customers who have not yet made the transition to RSIGuard Version 4 should visit www.rsiguard.com/upgrade.
